## **Description:**

After rapid development in the recent 10 years, China now can produce most kinds of common flame retardants. There are more than 300 producers in China.

The 21 companies are key players in China's flame retardants industry, representing the top level

of China's flame retardants production and marketing.

The report has analyzed the 21 companies from many aspects in detail, which includes:

" Company basic information

" Company background

" Production situation and marketing.
